# GCSE COMBINED SCIENCE: TRILOGY

Foundation Tier Chemistry Paper 2F

Wednesday 12 June 2019 Morning Time allowed: 1 hour 15 minutes

#### **Materials**

For this paper you must have:

- a ruler
- · a scientific calculator
- the periodic table (enclosed).

#### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided.
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

### Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

Student **A** investigated how the mass of the small stones in concrete affects the strength of a concrete beam. All other variables were kept the same.

The student added weights until the concrete beam broke.

Figure 1 shows the apparatus Student A used.

Figure 1

**0 2** . **3** Draw **one** line from each type of variable to the correct example of the variable.

[2 marks]

## Type of variable

# Example of variable

Length of concrete beam

Control

Mass of small stones in concrete

Independent

Time taken to add weights

Weight needed to break concrete beam

Table 1 shows Student A's results.

Table 1

| Mass of small stones in grams (g) | Weight needed to break<br>concrete beam in<br>newtons (N) |
|-----------------------------------|---|
| 500                               | 70  |
| 1000                              | 100   |
| 1500                              | 110   |
| 2000                              | 100   |
| 2250                              | 85  |
| 2500                              | 65  |
| 2750                              | 35  |

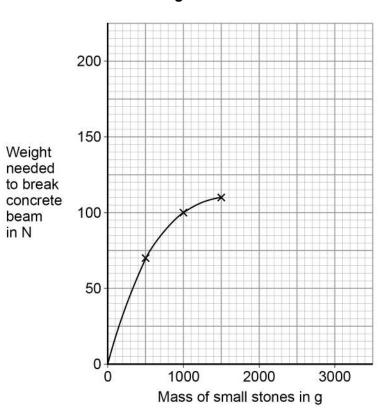

0 2 . 4 Plot the data from Table 1 on Figure 2.

The first three points are plotted for you.

Draw the line of best fit.

[3 marks]
