Beta blockers are another type of drug that slows the heart rate.

Table 2 shows information for people who do not take beta blockers and for people who do take beta blockers.

- Stroke volume is the volume of blood pumped out of the heart each time it beats.
- Cardiac output is the total volume of blood pumped out of the heart each minute.

	Г		l		
	No beta blockers taken		Taking beta blockers		
	At rest	During exercise	At rest During exercise		
Heart rate in beats per minute	68	150	52	88	
Stroke volume in cm ³	80	120	X	98	
Cardiac output in cm ³ per minute	5440	18 000	2800	8624	

Table 2

Calculate stroke volume X in Table 2.

Use the equation:

cardiac output = stroke volume × heart rate

Give your answer to 2 significant figures.
